- subgame, 43, 113, 117–120, 122–124, 133, 134, 136–139, 143, 146, 154, 234
- subgame-perfect equilibrium (SPE), 113, 117, **119**, 123, 124, 136, 137, 139, 146, 154
- substitutes, **37**, 40, **347**
 - partial, 347
 - strict, 347
- superadditive game, **370**, 381, 384, 391
- superadditive valuation function, *see* complementarity
- support, *see* mixed strategy, support of
- support-enumeration method, **100**, 112
- symmetric game, 211, **213**, 221, 311
- synergy representation, 381, **384**, 385
- targeted learning, **211**, 212, 222
 - efficient, 211
- targeted optimality, 195, **211**
- TCP user's game, **54**
- team game, **56**
- Tit-for-Tat (TfT), **144**
- tit-for-tat (TfT), 144, 148–150, 187, 191, 194, 200, 203, 204, 210, 211, 222
- total preorder, 255, 416, 429, 433, 435
- total unimodularity, **350**, **454**
- tractability, **274**, 275, 287–289, 359
- traffic, 19, 43, 45, 56, 170, 172–175, 262, 296, 307
- transferable utility, **271**, 367, 368, 388
- tree-form game, *see* extensive-form game
- tree-structured bid, **351**
- trembling-hand perfect equilibrium, **83**, 216
- trigger strategy, **144**, 146, 150, 151, **201**, 203, 204, 332
- truthful, 261, **265**, 266–268, **273**, 276–280, 282–284, 289, 290, 292–295, 299, 300, 305, 312, 319, 320, 327, 329, 331, 338, 339, 342, 343, 345, 346, 348, 349, 358, 359, 361, 364, 377
- two-sided auction, **361**
- two-sided matching, **301**
- type, 157, 159–167, 214, 224, 263–265, 267, 268, 272, 273, 292, 294, 295, 318, 323–325, 424
- unblocked matching, **303**
- unconditional regret, 210
- uniform pricing rule, **336**
- unit resolution, **6**
- universal consistency, **195**, 209, 222
- utility function, 40, **47**, 48, 49, **52**, 53, 55, 60, 102, 105, 114, 120, 123, 150, 155, 159, 160, 166, 167, 171, 182, 183, 243, 262–264, 266–269, 271–273, 276, 288, 318, 321
- utility theory, **47**, 49, 50, 85, 263

- validity, **399**, 413, **457**
- valuation, **272**, 315, 319, 321–333, 335, 336, 338–343, 345–350, 352–360
- valuation function, 37, 276, 296–298, **346**
 - nonadditive, **347**
 - subadditive, *see* substitutes
 - superadditive, *see* complementarity
- value
 - affiliated, *see* affiliated value
 - common, *see* common value
 - independent private, *see* independent private values
